Khalil Bouhlel

a solid IT foundation and hands-on expertise in web development, and full-stack technologies, I bring a well-rounded skill set. My experience combined with certifications, positions me to contribute effectively to dynamic development teams. My leadership role in university clubs and continuous growth further support my ability to manage and execute complex tech projects.

PROFESSIONAL EXPERIENCE

Full-Stack Web Development Bootcamp   Jan 2024 - July 2024
Elif Center, Kef   *Tunis, Tunisia*

- Led the development of a full-scale e-commerce platform, integrating both the front-end and back-end to provide a seamless shopping experience.

- Utilized Angular to build dynamic, user-friendly interfaces, focusing on responsiveness and smooth interaction.

- Leveraged Spring Boot to design and implement secure, scalable APIs for product management, user authentication, and order processing.

- **Web Scraping Integration**: Integrated advanced web scraping technologies to automate data collection from external websites, enriching product information and keeping inventory data up to date.

End-of-study Internship   Jan 2023 - Jul 2023
Innovup   *Tunis, Tunisia*

- Developed a comprehensive online training platform using Laravel, with multi-authentication and responsive design to ensure seamless access across devices. Created a mobile app using the Ionic framework (based on Angular) that serves as a community forum where students can communicate and support each other. The platform features role based access for users (students, instructors, admins) and provides a responsive, mobile-first experience for easy course management and progress tracking.

End-of-Year Internship   Jul 2022 - Aug 2022
1Way-Dev   *Tunis, Tunisia*

- Developed a gig hunting and hiring platform using Laravel, designed to connect freelancers with potential employers. The platform features a streamlined user experience, allowing gig hunters to easily find job opportunities, while employers can post listings and manage applications. It includes secure user authentication, job management, and profile customization functionalities, all within a responsive and mobile-friendly interface.
